Keep the Good Times Rolling

Details on Page 2

From the President - Theresa E. Rylko

As the weeks go by, I am slowly getting caught up on the piles of memberships that are still coming in. Thank you for being patient.

Thank you all for helping keep the MVRS on track by spreading the word. Please consider helping out on the various committees. Trip Team needs your help to keep the trips rolling. The Waybill needs to have your input to get the word out.

If you have any comments for Membero-Gram (maybe a favorite picture of yourself enjoying one of the trips or a couple of sentences about a favorite trip) please send them in. Keep in touch with fellow travelers. We never publish telephone numbers or addresses in this column.

If there are any suggestions of how we might improve your enjoyment of the Waybill

please let us know. This is your publication.

If you want to receive a small stack of Waybills to pass out in your favorite spots, please let me know and I will mail them out to you. As you travel along you might see an area which others might enjoy. Feel free to send some literature to the Trip Team to review for future travels.

The Mystic Valley Railway Society Trip Team is hard at work planning more trips for members and would appreciate your input. The 2019 Russell Rylko Grant was awarded jointly to the Boston Street Railway Association, Boston MA and the New England Steam Corp., Conway NH. Unfortunately, the grant and further train/trade shows will be on hiatus for a year, and then their future will be reviewed. In the meantime, we appreciate your input as this is your Waybill!

From the Vice President - Jeff Costello

Best train trip ever! I promised you in the last Waybill to share our adventures through the Pacific Northwest and the Canadian Rockies and the best train - The Rocky Mountaineer! We boarded the Rocky Mountaineer in Vancouver traveling to Kamloops, located in the heart of British Columbia's interior. On Day 2 we travelled from Kamloops to Jasper, over the Yellowhead Pass into spectacular Jasper National Park. On the Rocky Mountaineer the seating arrangements are very comfortable: heated reclining seats with plenty of legroom and a magnificent view in the domed coaches with expansive windows. We had excellent views of the majestic Canadian Rocky Mountains and even caught sight of elk, impressive bighorn sheep, black bears, moose, bald eagles, and osprey. Our journey continued with a sightseeing tour along the Icefields Parkway, one of the world's most scenic highways. This included a visit to the Columbia Icefield and a walk on the slopes of Athabasca Glacier. I could go on forever about the Banff Gondola ride to the top of Sulphur Mountain and a helicopter tour over the remarkable landscape of the Canadian Rockies. It was a truly breathtaking and memorable trip! My wife loved it and wanted

From the Membership Chairman – Nancy Jeanne Martin

I decided it might be fun to know how many membership renewals the MVRS has by location so far this year that started April 1. Bear in mind this list is not completely up

- New England: 204
- Other states: 18
- Rest of the world: 1

In addition, there are our many Life Members. I know for certain there is 1 in PA as he is my grandson.

Things are going well. We had 47 people on the July Cog Railway trip. It was great at the Mt. Washington Hotel for lunch as we ate on the porch overlooking the mountains. At the top it was foggy and rainy, but I belong to the Mt. Washington Observatory so went and asked to meet the newest cat "Marty". They found him for me, so I had a chance to go in and meet him, giving him some pats

from Massachusetts. Summer so far has been hot but expect fall colors beginning with our September trips: White Mountain Wildcat, Hobo Railroad & Kellerhaus and The Festival that Stinks. Other new trips later in fall are listed in this Waybill.

If you think I have been slow with mailing your membership card, I have. I will try to

From the MVRS Legal Counsel – Brad Pinta

The importance of having in existence written documentation on virtually any type of a life-related relationship cannot be underestimated. Do you have a Will or a Durable Power of Attorney? Obviously, these types of instruments are intended to address your legal affairs at the time of your death or disability. And in terms of your estate plan, who is the person you have assigned to handle and see through to completion and execution your affairs, and who have you named to be your beneficiaries? Going a bit further in terms of your daily work activities, do you have an employment agreement or some type of a written contract concerning your employer, employees, partners, and/or co-stockholders? These types of documents serve to address your work-related activities and business interests. Additionally, what about your living arrangement and, more specifically, what happens to your residence when you pass? How is the title to your real estate held and/ or do you have a lease for your home or business such that upon your death substantial

balances would not be owed for the remaining tenure of the lease term?

In my professional experience as a civil litigation attorney in the Massachusetts court system for more than 38 years, it still astonishes me how many times existing and potential clients seek my services far too late. One of the very first questions I raise when called upon in these situations is whether or not any written supporting documents or materials exist that would serve to confirm the client's legal posture in the dispute. In reality, I am unable to respond to the client's question of, "Do I have a case," unless and until I have had an opportunity to review any such written documentation. I realized many years ago that the true barometer as to whether or not a client can be successfully represented in a dispute is, for the most part, based upon the written materials that may exist in his or her favor. If you hand me a case that has in existence a clear and unambiguous contract, substantiated by that client's supporting conduct, I am usually quite confident that a successful result

of documentation, the client's legal posture

My point here is very simple. In today's complex society, it is imperative to have written documents to address your relationships and your intentions upon your death. A wonderful lesson from the famous Pablo Picasso is worth sharing, in that he is credited with the comment: "Only put off until tomorrow what you are willing to die having left undone." Incredibly, Picasso died in 1973 at the age of 91 intestate, meaning he had no will. He left a large tax bill owed to France and, among his other heirs, a child born out-of-wedlock who had to fight to be legally recognized as an heir. Ultimately, it took years and a reported 19 lawyers to settle his estate. I suggest that you take a hard look at your own legal affairs to assess if you are properly prepared for the future.

can be achieved. However, without this type is weak, and it becomes difficult to achieve a swift and successful end result to a particular dispute.

MEMBERSHIP APPLICATION **New England** By Train!

The Mystic Valley year runs from April 1 - March 31

Here's what's included:

- Our quarterly paper, The Waybill, filled with pictures and schedules of RR events.
- Exclusive members-only tours to unique activities and locations.
- Color Railroad calendar with 12 frameable
- prints (while supplies last).
 Annual Calendar Color Slide Contest for
- members.

News from Britain - May to July 2019

by James Scannell

New London Overground electric trains enter service

8:30am

9:00am

Two new four-car Class 710 electric trains entered passenger service on London Overground's Gospel Oak to Barking line on Thursday May 23rd and was the first step in returning the service on this busy north London line, operated by Arriva Rail London (ARL), to four trains per hour, boosting capacity and delivering greater reliability. The new electric trains, built by Bombardier in Derby, can carry nearly 700 people. This is double the capacity of the old diesel trains that had been operating on the line. The new trains will be much better for air quality and the environment.

More trains will be put into service over time and it is expected the regular 15 minute – four trains per hour frequency will be restored later in the summer. A month of free travel will be given to customers on the line from September 2019.

Eight of the 54 state-of-the-art trains on order from Bombardier will be put into use on the London Overground Gospel Oak to Barking line. The remaining will be used on the Watford Junction to Euston route and on London Overground services out of Liverpool Street to Cheshunt, Chingford and Enfield Town later this year. They will also be used on the extension to Barking Riverside when it is completed in 2021.

Features of the new Class 710 trains include the latest intelligent lighting and temperature control for more comfortable journeys, as well as Wi-Fi, USB charging points and digital information screens giving customers higher quality real time travel information while on board.

Operated by Arriva Rail London (ARL), on behalf of Transport for London (TfL), the new trains will debut a new color scheme and unique seat moquette. The trains are constructed from strong but lightweight material, making them much more energy efficient to operate, and feature walk-through carriages for greater capacity.

Contract awarded to replace oldest DLR trains

Customers using London's Docklands Light Railway (DLR) will benefit from more frequent and reliable journeys from 2023, after Transport for London (TfL) announced in June that it had awarded a contract to replace the oldest trains currently serving the railway to Construcciones y Auxiliar de Ferrocarriles, S.A (CAF). The order will replace the oldest rolling stock on the DLR. Being nearly thirty years old, these have come to the end of their design life and are in vital need of replacement to ensure a reliable service is maintained for customers.

With over 400,000 journeys made each weekday, the DLR is currently the busiest light railway in the UK. The new trains will provide more frequent direct services to the growing employment centre and cultural hub at Stratford, allowing people from across south-east London to reach new jobs in east London without the need to travel through Zone 1. It also serves Canary Wharf, a vitally important centre for the financial and professional service industries.

Tracks We Have Crossed

MVRS COG RAILWAY July 14, 2019

by Nancy Roney

MVRS members headed north on Sunday July 14th to celebrate a special 150th anniversary by traveling to the summit of Mt. Washington via the legendary Mt. Washington Cog Railway. During its almost 50 years the Society has travelled many times up the Cog in different seasons. Each trip to the summit of this unpredictable mountain is memorable and different. I recall Sally Avjian saying that on one of her trips the group experienced a snowstorm on the way down.

Our lunch was at another legend, the Mt. Washington Hotel. It is like a jewel in a perfect setting of lush green forest surrounded by the impressive Presidential Mountain Range. We dined alfresco on the South Veranda overlooking the entire Presidential Range. The view definitely added to the fine dining experience.

Then we were off to the Base Camp for the Cog Railway to board our train for the ascent to the 6,288-foot summit. The Cog Railway was the inspiration of Sylvester Marsh. His engineering skill was challenged by the mountain and the result was this unique way to reach the top. Nowadays, though mostly biodiesel engines take visitors to the top, the railroad still has two coal-powered steamers. On our descent we passed Engine #2, a steam engine, chugging to the peak.

Despite human ingenuity, the mountain still is unpredictable. It is noted for its quickly changing weather conditions. Though base camp was around

72 degrees, at the summit temperatures hovered around 45 degrees. Last year I visited the top with my son and conditions at the top were 74 degrees and perfect viewing conditions. This year we were greeted with a refreshing polar wind which quickly turned into strong chilly blasts. A dense fog enveloped the peak and weather observatory and we gave up hopes of viewing anything more than 10 feet away. Still, I found the weather very intriguing and it was an interesting experience even though we didn't see the hoped-for views. Mother Nature is in charge. I'm sure the builders of the Cog Railway understood this 150 years ago and respected the mountain. Inside the visitor center we visited the Mt. Washington museum and some ventured outside to the observatory desiring to experience the weather conditions for themselves.

Nancy Martin, the tour leader made the most of our hour-long stay at the top by using her connections with the Science Museum to visit the weather observatory and meet the observatory weather mascot, a cat named Marty. Coincidentally, Marty was the name of Nancy's late husband and MVRS director Marty Martin. Marty the cat was reserved but allowed Nancy to give it a friendly pat.

Back at the base camp we removed our cold weather gear and posed for a group shot. I hope MVRS keeps returning to the Cog for many more years.

The DLR operates across six Opportunity Areas in London, which have the potential to provide more than 124,000 homes and 200,000 jobs. There are around 45,000 of these homes already under construction, or with planning permission, within walking distance of the DLR. The additional capacity the trains will deliver is essential to support further growth beyond that already permitted, particularly in parts of the Royal Docks and the Isle of Dogs where the DLR is the main transport option.

Metrolink is one of the best light rail systems in the World

According to experts who carried out an international study of light rail systems, the Greater Manchester system, known as Metrolink, was rated the as fifth best in the large cities category, scoring 66/100 based on ten separate criteria. Metrolink was praised for its

off-peak frequency, pricing and ticketing, use of resources, economic balance and tram ridership dynamic. The comparative study, which looked at 32 tram systems from across the world, was published by Eurogroup Consulting in July.

Contactless Payments introduced by Metrolink

From Monday July 15th Metrolink passengers in the Greater Manchester area were able to use their contactless device to simply touch-in and touchout at tram stops, with the system working out their fare, up to a daily cap. Metrolink customers can already use their contactless bank card to buy a ticket at a ticket machine, and this will remain an option. What the new 'intelligent' contactless system will do is cut out the need to buy a ticket or download the app.

MEMBER-O-GRAM

Director **Nancy Roney** recently drew our attention to how Florida plans to expand its transportation options by linking up with Virgin Trains USA. In the UK Virgin operates many trains. For example, on the 200-mile West Coast Main Line route between Manchester and London their trains take just over 2 hours with several trains each hour. Far better than many a bus service. **Bill McCaffrey** also mentions this topic in his column, The Roundhouse, on page 7.

Riding the Rails photojournalist **Bob LaMay** reports he is on his way to St. Augustine FL having sold his house up north. He promises to keep sending photos taken before the move for The Waybill and wishes everyone well. And columnist **Bill McCaffrey** will also be on the move in the next couple of months. That each submitted their Waybill column punctually while so busy is much appreciated.

Heads up: there are plans afoot for next year's Mystic Valley Railway Society 50th anniversary. Watch out for more details in the November 2019 – January 2020 Waybill.

Calling all Members!

ARE YOU LOOKING FOR ACTIVITY??

NEW FRIENDS TRAVEL OPPORTUNITIES REWARDING EXPERIENCES WAYS TO HELP OTHER MEMBERS or SHARE A CAREER SKILL??

ALL ABOARD with the Mystic Valley Volunteers – the activities are as varied as their locations. Auto transportation is essential for some events, but many are located on the MBTA routes and may gather at special locations or at members' homes. Is distance an impediment? **NO WAY,** for we have dedicated members in many states and foreign countries who complete their activity by letter or E-Mail. Remember: volunteering allows you to share your talents and interests with those who would benefit most.

TO JOIN THE FUN Please request a volunteer form by submitting your request & membership number to: M.V.R.S. P.O. Box 365486, Hyde Park, MA 02136-0009 or visit our Website www.mysticvalleyrs.org.

WHAT HAPPENS NEXT? Your request is presented at our regular meeting so that you will be contacted by the appropriate chairperson. From there it is up to you how involved you wish to be, for the level of activity and variety of trips offered by the Society are solely determined by the level of participation supplied by our volunteer members. WELCOME ABOARD!

Booking Conditions

"We expect people to act respectful in a cordial manner. We also expect our passengers to follow instruction from supervised personnel on all transportation vehicles, i.e., trains, buses, boats, etc. It is important instructions be followed to maintain safety of all participants.

If any passenger is disruptive or refuses to follow direction they are subject to be prohibited from taking part in future trips. To be clear we consider non-compliance with safety directive to be a serious matter as well as use of foul language and disruptive conduct. Any of these behaviors will be grounds for prohibition of participation in future trips and events."

Handicapped Information

The Mystic Valley Railway Society, Inc., endeavors to provide its passengers with information regarding the accessibility of and facilities available for the benefit of our handicapped ridership. In doing so, we make inquiries of the facilities visited and equipment used on each of our trips. Accordingly, since we merely convey this information, we cannot be held responsible for its accuracy.

If you are not self-sufficient and have special needs, you must travel with a companion who can provide assistance to you. By making a reservation for a trip, you are certifying that you do not have any mental, physical or other medical/disability condition that could compromise your safety or that of other trip participants. If you are uncertain about the demands or difficulties of a particular trip or event, please call us for details.

idea

TRIP IDEAS!

Have you visited somewhere around New England that you think the Mystic Valley Railway Society's members and friends would enjoy as much as you did?

PLEASE LET US KNOW!

Our Trip Team is always looking for new ideas, places to eat, things to see and do, train rides, museums, boat rides, etc.

With your help we can offer trips at a reasonable cost, that otherwise might have been overlooked.

Please contact us by e-mail at contactus@mysticvalleyrs.org or via regular mail at MVRS, P. O. Box 365486, Hyde Park, MA 02136-0009.

Please provide your phone number or e-mail address, so that we may contact you, should we need more information.

THE MVRS TRIP TEAM IS HERE FOR YOU! BE THERE FOR THEM!

THE FESTIVAL THAT STINKS!

Sunday – September 29, 2019 FARE: \$70 PP

Take a peek at the fall foliage as we travel to Orange in central Massachusetts. The 21st North Quabbin Garlic & Arts Festival celebrates peace, love and garlic. It has a hundred booths featuring not only farmers, garlic and cooking demos but also regional artists and healing arts exhibitors, plus community organizations encouraging recycling and energy conservation. Enjoy music and spoken-word performances on three stages. Plenty of healthy farm-fresh and savory options at the food courts for lunch on your own.

FEATURES:

Round Trip Comfortable Motor Coach Six hours on your own at Garlic Festival

Riding the Hobo Railroad along Lake Winnipesaukee

By Dirk Hertel

On Saturday, September 28, 2019 the MVRS will travel to Lake Winnipesaukee in New Hampshire. The trip will include a scenic train ride along the lakeshore, complete with a turkey dinner served on board. The excursion train, operated by The Hobo and Winnipesaukee Scenic Railroads, will travel on historic trackage that once belonged to the Boston, Concord & Montreal Railroad system. Travelers on The Winnipesaukee Scenic Railroad can board excursion trains at Meredith or Weirs Beach stations that take them along the lakeshore either northbound towards Ashland and Plymouth, or southbound as far as Lakeport.

The historic waymarker at the beautifully restored and maintained historic Ashland depot tells the interested visitor more about the early days: "The Boston,

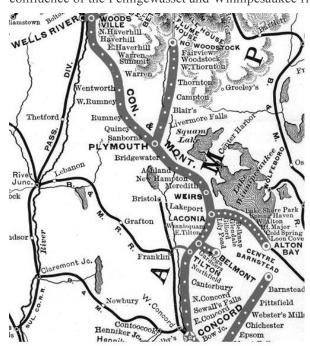

Concord & Montreal Railroad was chartered in 1844. Construction of the main line began in Concord in 1846. The tracks were completed to Laconia in 1848, to Ashland in 1849, and to Wells River, Vermont in 1853. The BC&M RR merged with the Concord Railroad in 1889 to form the Concord & Montreal Railroad (C&M), which was taken over by the Boston & Maine Railroad (B&M) in 1895. The BC&M RR and its branch lines contributed greatly to the economic development of central and northern New Hampshire and

to the growth of tourism in the Lakes Region and the White Mountains."

The last sentence on the waymarker highlights why railroads were built into the wilds of rural New Hampshire. First, the industrial revolution's tentacles spread along the larger rivers that provided the water, waterpower, and transport necessary to run a textile mill. From Lowell in Massachusetts, industry progressed up the Merrimack River to Nashua, Manchester and finally Concord, the capital of NH. It had been relatively recent, in 1733, when Massachusetts had granted the site to the white settlers displacing the native population. Industrial growth led to a booming population that needed more food and supplies than the surrounding countryside could supply. As soon as railroads became technically viable, they rapidly became the preferred mode of transportation because, unlike roads or waterways, they could be worked all year round.

Between Nashua and Concord the terrain was kind to the railroad as it could parallel the Merrimack River. North of Concord, the Merrimack begins at the confluence of the Pemigewasset and Winnipesaukee rivers. The railroad follows

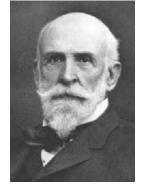

Cutout from 1894 Concord & Montreal map

the Winnipesaukee east because of its gentler gradient and, importantly, access to the plentiful waters of the lake system. It enters the Lake Region at its outlet in Laconia then continues along of Lake Winnipesaukee to Lakeport, once the junction for trains to Alton Bay and Portsmouth, now the southern terminus of the Winnipesaukee Scenic Railroad, where the B&M freight depot still stands. The line crosses the lake's outlet on a drawbridge then follows the western shore of Paugus Bay to Weirs Beach where it turns

northwest towards Meredith, today's departure point for The Winnipesaukee Scenic Railroad. From there it follows the shore of Lake Waukewan before crossing the watershed to join the Pemigewasset River at Ashland and following it north to Plymouth. From Plymouth the railroad at one time went west to reach the Connecticut River at Haverhill NH through the valleys of Baker River and Oliverian Brook, thus altogether avoiding the veritable barrier of the White Mountains. It crossed the Connecticut River to Wells River VT for connections

to Montreal via the Central Vermont RR. Spur lines to reach the White Mountains were attempted, to harvest their vast lumber resources. In 1874, the Pemigewasset Valley RR was chartered to add 20 miles from Plymouth to North Woodstock and Lincoln, Franconia Notch's southern gateway. Five logging railroads branched from this line. Lincoln is the northern terminus of the Hobo RR. The BC&M's most prominent builder and director was Benjamin Ames Kimball (1833-1920). His summer home, the now-crumbling Kimball Castle, an 1890s replica of one on the Rhine, is on a lakeside promontory five miles east of Weirs Beach.

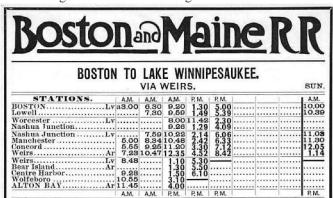

Once factory workers had gained their share of industrial wealth in the form of disposable income and leisure time, they too became potential customers of the railroads. Two decades after the Civil War, in the 1880s, the C&M recognized tourism as a potential source of income and enticed potential customers to venture

out of crowded cities on frequent, convenient trains to enjoy the beautiful scenery of New Hampshire. The Concord & Montreal Railroad Booklet (ca. 1893) waxed lyrical about the scenic beauty of New Hampshire and named it the 'Switzerland of America.' "Possessing the rugged and picturesque mountain and lake features which have made that diminutive European country so famous, the Granite State offers these in a far grander and more diversified presentation and with a charm and fascination of detail which even the Alpine region cannot boast. Besides, New Hampshire affords that which Switzerland does not: the most beautiful and attractive rivers and streams in existence, watering lovely vales and supporting and enriching farming and rural districts, such as would be sought for in vain in any other country under the sun."

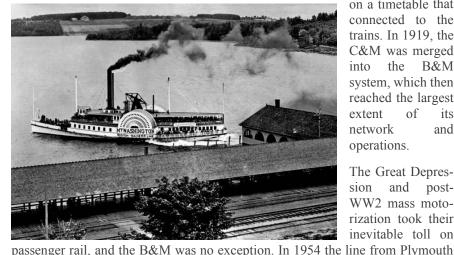

Weirs Beach, the departure point for steamboats plying the lakes and taking people to various hotels along the shores, became known as Weirs Steamboat Landing or simply The Weirs. In 1883 the BC&M reached its peak as an independent railroad. That year its 37 locomotives, 21 coaches, 5 parlor cars and 3 observation cars carried 343,630 passengers. From 1884 to 1887 the BC&M was leased by the Boston and Lowell RR and renamed B&L White Mountain Division. The B&L invested heavily in its tourist operation, marketing and advertising, and built Weirs Café. In 1890, the former BC&M merged with the Concord NH railroad becoming the C&M. In 1892, ever-increasing volume of tourist traffic induced the C&M to replace the one-room depot in downtown Laconia with a new, much larger one in the Romanesque Revival style popularized by American architect Henry Hobson Richardson. Although no longer serving the railroad, the 1892 depot still stands today and is worth a visit to see the waiting room's ceiling that is over 50 feet high.

peak passenger traffic came after 1895 when the B&M leased the C&M extended and service to four daily roundtrip express trains between Boston's North Station and The Weirs, the

fastest completing the journey in just over 3 hours.

The 1904 postcard shows the steamboat "Mt. Washington" operated by the B&M

on a timetable that connected to the trains. In 1919, the C&M was merged into the B&M system, which then reached the largest extent network operations.

The Great Depression and post-WW2 mass motorization took their inevitable toll on

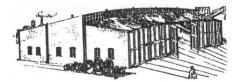

to the Connecticut River was abandoned, making Lincoln its northern terminus. Passenger service from Boston to Laconia ceased in 1965. In 1970 the once mighty B&M filed for bankruptcy protection then limped along until 1983 when it was sold to Guilford Transportation Industries. Fortunately, the state of New Hampshire initiated a policy of acquiring railroad lines to "encourage active freight rail service ... as an economic development measure" and to "preserve them for possible future use." This provided an opportunity for two tourist railroads, both owned and operated by the Clark family, who would lease trackage from the state: in 1984 the Winnipesaukee Railroad begun running trains along the lakes, and in 1986 the Plymouth and Lincoln (the Hobo Railroad) followed suit. In 1991 both operations were united as The Hobo Railroad and Winnipesaukee Railroad, creating a tourist railroad with 54 miles of available track between Northfield and Lincoln. Over the years, this railroad has assembled an impressive roster of rolling stock from diverse railroads including B&M, Bangor & Aroostook and Canadian National, all restored and maintained in the company's own shops at Lincoln. The New Hampshire State Rail Plan, released in 2001, classified the entire length from Concord to Lincoln as Class 2 Railroad. This provides means for track maintenance and upgrades, including bridge replacements that would be too costly for any tourist railroad to shoulder. This arrangement ensured that the Winnipesaukee Railroad has been able to quickly recover each time flooding severely damaged the line, most notably in 2008 and 2011. It demonstrates how involvement of the state can be instrumental in maintaining critical infrastructure for private rail operators, the same way truck operators rely a state-maintained road system. In February 2019 the NH Senate voted to fund studying the Capitol Corridor rail project to return passenger service north from Lowell MA to Nashua, Manchester and Concord. This would open the possibility of trains to the lakes.

The MBTA has awarded a contract to A.A. Will Corporation for \$32,367,200 to build a new Chelsea Commuter Rail Station with a connection to the Silver Line 3 - Chelsea service. [MBTA press release]

Railpace reports that Tower A across the Charles River from North Station closed in March of this year. The building was declared unsafe. In recent years heavy wooden beams were used to shore up the brick wall. Its functions were transferred to a leased trailer mounted on scaffold staging. Tower A was placed in service on September 27, 1931. At one time it had electropneumatic machines with 229 levers for controlling switches and signals. It was one the few buildings to have the words "Boston and Maine Railroad" still etched on its wall.

Amtrak has announced that buses will be substituting for the Boston section of the Lakeshore Limited between Boston and Albany. The bus will make all station stops EXCEPT Back Bay and Framingham. This affects travel on many but not all dates between May 20 and August 1.

From the website of US Senator Susan Collins of Maine: U.S. Senator Susan Collins, the Chairman of the Transportation Appropriations Subcommittee, announced that the Maine Department of Transportation (MaineDOT) has been awarded \$17,468,840 for infrastructure upgrades and rail crossing safety improvements along approximately 75 miles of the Pan Am Railways freight mainline in rural parts of central and southern Maine. This funding has been awarded through the U.S. Department of Transportation's Federal Railroad Administration's (FRA) fiscal year (FY) 2018 Consolidated Rail Infrastructure and Safety Improvements (CRISI) Program. Through this project, MaineDOT will address rail safety concerns by replacing equipment that, in some cases, is almost 50 years old. The project will modernize 75 miles of Pan Am Railway mainline track in Maine, including replacing 37 miles of rail, upgrading 25 switches, upgrading 47 public and 42 private at-grade rail crossings, extending and upgrading an existing siding, replacing signal systems, and replacing bridge deck timbers on eight

BRUNSWICK - The Coastal Connection, a proposed seasonal weekend Downeaster service to the Midcoast, has

been delayed yet again and will not be ready for summer operation, according to Patricia Quinn, executive director of the Northern New England Passenger Rail Authority. The line would have run two-hour weekend trips from Brunswick to Rockland with stops in Bath, Wiscasset and Newcastle.

The Northern New England Passenger Rail Authority manages Maine's contract with Amtrak, but the Maine Department of Transportation owns the 58-mile track between Brunswick and Rockland and leases with the Central Maine and Quebec Railway to carry freight on the line, Quinn said. Because of this, there are many moving pieces that need to be sorted out in order to start training crews to run the service. "It's taking longer than anticipated for the legal operating requirements side," she said, adding that they will "continue the dialogue". [from The Times Record]

Here are a few items from railpassengers.org:

Amtrak introduced new Cafe Car menus on all Acela Express and Northeast Regional trains the week of June 9. Newly featured items include hot White Cheddar Mac & Cheese, a Pepperoni & Cheese snack tray and Cavot Pinot Grigio wine which is available in half bottles.

An investigative report from NBC Boston the second week of June regarding overcrowded Downeaster trains, which included an interview with a pregnant woman and her husband who are both daily riders into Boston, prompted a response from Northern New England Passenger Rail Authority (NNEPRA) Executive Director Patricia Quinn on the current capacity issues on the route. In a letter that was handed out to commuters on June 11, Quinn explained that the number of monthly pass holders puts a strain on the availability of seats because of the way the current system works: riders with monthly passes can hop on any train without going through an online reservation. Quinn also stated that adding additional capacity to combat the high demand is not "feasible on a permanent basis" and that overcrowding to likely to continue. A fare increase for monthly passes is under consideration.

Amtrak is on track to introduce new high-speed trains for revenue service on the Northeast Corridor (NEC) from Washington D.C. to Boston as early as 2021. While it'll be marketed under the same name as the fleet it's meant to be replacing, the nextgeneration Acela is far from a refresh, Amtrak and Alstom officials said during a press tour held on June 12 at the Alstom manufacturing facility producing the fleet in Hornell NY. The new trains are capable of 186 mph but there is no place on the Northeast Corridor that is safe for speeds in excess of 160 mph. The new trains will be tested at the Transportation Technology Center in Pueblo CO before they enter service. In the meantime, Amtrak has made an effort to re-

fresh the interiors of its current 20-trainset Acela fleet by replacing seat cushions and covers, installing new carpet runners along the aisles and deep cleaning each of the 100 cars. [Progressive Railroading]

LONG OVERDUE - On July 2, 2019 Governor Baker led a ceremonial first shovel ground-breaking event in Freetown for South Coast Commuter Rail. This has been proposed and promised over and over again. The Governor promised that this time it is real. Line will run via Middleboro. A News Center Five video can be viewed at https:// www.youtube.com/watch?v=ktiabugpsDY &feature=share

TRAINS Magazine columnist Fred Frailey in the August 2019 issue has a fascinating article on the extreme difficulties of building new rail lines with government money. There are too many greedy people with powerful political influence such as consultants, unions, local elected officials who can demand huge amounts of nonproductive spending and who make more money the longer a project is delayed. He did not mention any New England projects. He mentions both high speed rail projects and commuter projects. One has to wonder how many of the problems of big fiascos in California, North Carolina affect projects in Massachusetts and Connecticut. On the bright side he mentioned two privately funded projects: Texas Central, a high-speed line between Dallas and Houston, and Virgin Trains in Florida [new name for former Brightline] that wants to link Miami and Orlando at more ordinary speeds. The name Virgin was added to this project when Virgin Atlantic Airlines became a major investor. How often do you hear about an airline investing in a rail project?

Starting on page 20 of the same issue is a detailed three page pull out map of the current rail situation in the Greater New York area. The map covers portions of three states NY, CT, and NJ. The beloved names from the past like PRR, NYNH&H, NYC, DL&W, etc. have all disappeared to be replaced by names like Amtrak, NJ Transit, Metro North etc. A few old names survive in modified form. For example, the Long Island Railroad is now the MTA Long Island

Railroad. The former Staten Island Rapid Transit once owned by the Baltimore and Ohio Railroad is now the MTA Staten Island Railway. In addition to railroads, the map also shows the New York City subway owed by the New York City Transit Authority and a few ferry lines.

By Bill McCaffrey

It was not my intention to make TRAINS Magazine August 2019 issue the center of attention in this column but there two more items that demand mention. Scott Hartley wrote a six-page article on the Central Maine and Quebec Railway which serves northern Maine and Eastern Quebec. Jim Wrinn wrote an article about Union Pacific steam locomotive number 4014 nicknamed "Big Boy" which includes a three-page picture pullout. Big Boy is a 4-8-8-4 locomotive weighing 381 tons and has thirty-two 68-inch driving wheels. It is the world's biggest steam locomotive and was restored to operating condition by the Union Pacific and christened on May 4 in Cheyenne WY by Union Pacific Chairman Lance Fritz and his wife Julie. It dominated railfan web sites in the month of May and lured many American and foreign railfans to Wyoming and Utah.

There is a YouTube video called "Amtrak's Dying Long Distance Trains" from the Wall Street Journal. It features a reporter riding the Crescent from Washington to New Orleans and gives brief look at the political battles on this subject.

PORTLAND, MAINE -Greater Portland Metro and the Northern New England Passenger Rail Authority (NNEPRA) have announced a partnership to improve the promotion of public transportation options between the towns of Portland, Freeport, and Brunswick, locations that are currently served by both METRO BREEZ and the Amtrak Downeaster. In an effort to maximize flexibility for passengers, an integrated rail/bus schedule has been developed to provide passengers with all bus and train service options on weekdays and weekends. In addition, both METRO BREEZ and Amtrak Downeaster have coordinated pricing to offer passengers a seamless fare structure with \$3 one-way, \$27 Ten-Ride, and \$90 Monthly passes for regular service. Reduced fare options are also available. "This schedule and fare structure make it easy for passengers to travel on the mode or schedule that best meets their needs. Take the train one-way and the bus the other." said Natalie Bogart, Marketing Director at NNEPRA. [NNEPRA Press Release

Lines fr#m Ireland

and greenest fleet in Irish public transport tery-electric hybrid trains. This is to ensure history commenced as Iarnród Éireann [Irish that should funding or planning processes Raill supported by the National Transport see the electrification of the first of the lines Authority (NTA), sought expressions of interest from global train manufacturers for up to 600 electric/battery-electric powered carriages over a 10-year timescale.

DART Expansion, a US\$ 2.2 billion investment under Project Ireland 2040, will see the capacity of the rail network transformed through investment in up to 300 new carriages, the electrification of lines from Dublin to Maynooth, M3 Parkway, Hazelhatch and Drogheda, and key infrastructure works to allow more trains to operate in the Greater Dublin Area.

The ambitious tender for new carriages allows for the planned fleet expansion, replacement of the original DART fleet (the 76-carriage fleet will be almost 45-years old at the end of the current National Development Plan in 2027) and other carriages, and ensures that the framework is in place for more carriages to be ordered if further growth in demand occurs.

While electricity-powered trains are expected to make up the overwhelming majority of train orders, the tender process is also

In May the process to order the largest providing for a possible first tranche of batcompleted beyond 2024, new trains will be available to operate from that date to meet the surging demand from commuters.

As well as this major order, Iarnród Éireann and the NTA are progressing shorterterm options to meet record demand on Ireland's railways with 47.9 million journeys in 2018, and capacity requirements becoming acute at peak times. Included are negotiations between Iarnród Éireann and its supplier seeking to agree an order for at least 41 extra Intercity railcar carriages, adding to an existing fleet of 234 vehicles, to enter service from late 2021, and the tender process underway by the NTA for the possible purchase or lease of pre-owned trains. This latter option would also involve modifications to fleet, particularly as Ireland's track gauge differs from that of other railways - the gauge throughout Ireland is 5 feet 3 inches. This arose from an inter-company dispute in 1843 when the Board of Trade ruled that the gauge in Ireland should be that. At that time there were only three railway companies in Ireland, one of which with just six miles of track. In 1846 the passage of the 'Gauge of remorris, Co. Mayo, (phase 3) represents Railways Act' fixed the gauge of track in value for money to the Irish public. Britain at 4 foot 8½ inch, allowed no more construction of 7 feet 0¹/₄ inch gauge other than those already authorized by parlia-

ment, and left unchanged the gauge previously determined for Ireland.

The recent Oireachtas [Irish Parliament] Climate Action Committee report recommended that the public transport elements of Project Ireland 2040 be prioritized, calling for the speedy delivery of public transport investment to encourage more people to choose sustainable modes and leave the automobile behind.

Iarnród Éireann has invited members of the public and interested organisations to participate in a public consultation as part of a financial and economic appraisal of proposals to extend the Western Rail Corridor on the west coast. Working to terms of reference specified by the Department of Transport, Tourism and Sport, Iarnród Éireann has appointed consultants EY-DKM Economic Advisory to undertake the independent appraisal and public and stakeholder consultation to establish if the proposed extension from Athenry, Co. Galway to Tuam, Co. Galway (phase 2) and from Tuam to Cla-

May to July 2019 By James Scannell

Due to engineering works in Northern Ireland between Portadown (County Armagh) and Lisburn (County Down), service alterations commenced on the Dublin and Belfast route from July 27th until August 23rd with train services to Belfast operating as a train only between Dublin Connolly and Portadown. Passengers traveling to and from Belfast changed at Newry for a connecting bus transfer. Departure times from Dublin Connolly, Drogheda, and Dundalk remained the same while bus departure times from Lanyon Place in Belfast, were advanced by up to 15 minutes ahead of scheduled train departure times.

On Saturday July 27th and Sunday July 28th additional DART services were provided by Iarnród Éireann from Dublin to Bray, Co. Wicklow, for the 100,000+ people who wished to attend the free 10th Bray Air Show. The air show was held over two afternoons off the mile-long Bray sea front in excellent weather and attracted exceptionally large crowds.

WEEKEND DAY TRIPS

EXPLORING CENTRAL MA

Saturday - October 26, 2019 FARE: \$99 PP

Go west! Our step-on tour guide will discuss the Quabbin Reservoir and its creation. The source of drinking water for much of eastern Massachusetts, the surrounding protected lands are home to many wildlife species. After lunch at the Salem Cross Inn, on to Breezelands Orchard in Warren. Either pick your own apples or purchase them from the farmstand and giftshop that also offers pies and baked goods, jam and cheese.

Round trip comfortable motor coach **Quabbin Reservoir** Salem Cross Inn Breezelands Orchards
